Qur'anic Grammatical Phenomena in the Studies of the Modernists: Study and Evaluation

Abstract of thesis

The present study aims at observing and investigating the functional aspects of modernist research in the attention getter structures of the upper supreme discourse in terms of the descriptive analytic approach to extract the research features based on it, whether on the level of the used procedural techniques or on the level of the obtained reading conclusions. It also aims at finding a dialogue atmosphere between the visions and ideas that are thematically connected to find out the differentiating and balancing aspects between them.
